

Special Issue

Sustainable Development of the City's Tourism

Message from the Guest Editor

Many cities and towns around the world which were once grappling with the consequences of overtourism are now looking for ways of recovering and rebuilding in the wake of the COVID-19 pandemic. While significant progress has been made in understanding the nature of sustainable tourism development, there still remains a number of important issues to be resolved. Therefore, this Special Issue of *Sustainability* welcomes contributions from researchers on the general theme of sustainable development of the city's tourism, and in particular, suggested topics for this Special Issue include but are not limited to:

- Models and methods of sustainable destination governance;
- Residents' perceptions and responses to unsustainable urban tourism;
- Sustainable innovations for mature destinations;
- Future proofing and planning for sustainable urban tourism development;
- Indicators for measuring and tracking sustainable urban tourism development;
- Role of local authorities in sustainable urban tourism development;
- Role of de-marketing in achieving sustainable urban tourism development.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.
