

Special Issue

Intelligent Sustainable Technology for Construction, the Civil Sector, and Infrastructure

Message from the Guest Editors

The Special Issue aims to encourage the research and practical community to introduce innovative methods, technologies, and techniques to construction, the civil sector, and infrastructure. The SPECIAL ISSUE may contribute to the dissemination of 4.0 industrial revolution technologies to the academic and the practical community involved in construction, the civil sector, and infrastructure, hence assuring sustainability in the profession. The Editorial Board encourages you to submit academic and practical papers, including case studies. Papers may include the application of 4.0 industrial revolution technologies to the construction, civil sector, and infrastructure community enhancing sustainability.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA
