

Special Issue

Climate Adaptation and Mitigation through Sustainable Energy Solutions

Message from the Guest Editors

Dear colleagues, This Special Issue aims to attract works of scientific interest to deepen our understanding of these fields with different approaches. Therefore, research activities about different strategies for climate change adaptation and mitigation in the energy sector are welcome. Topics for this Special Issue include but are not limited to:

- carbon footprint and energy efficiency
- climate neutral business
- energy-related carbon emissions reduction
- carbon capture and storage
- renewable energy
- decarbonization of energy supply
- reducing energy demand
- energy efficiency enhancement
- behavioral changes
- circular carbon economy
- carbon neutrality at universities
- climate mitigation in cities
- energy infrastructure resilience
- adaptation measures of the energy sector

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
