

## Special Issue

# Implications of Climate Change for Ecosystems and Society

### Message from the Guest Editors

This Special Issue is focused on the implications of climate change for ecosystems and society. Climate change is affecting ecosystems and society in numerous ways, and continued climate change is expected to have significant consequences. The identification of vulnerabilities and development of adaptive actions are critical to reducing the negative effects of climate change and helping transition ecosystems and society to deal with changing conditions.

Contributors from different fields are invited to submit their articles on topics including (but not limited to): identification of vulnerabilities, adaptive approaches to climate change, successes and failures in working with organizations to develop vulnerability assessments and adaptation options, ideas to more effectively frame and address climate change, and climate change metrics that connect to human lives and livelihoods. Research should address climate change consequences for ecosystems and social systems.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
