

Special Issue

Climate Change and Sustainable Urban Environmental Planning

Message from the Guest Editors

To support sustainable urban environmental planning, this Special Issue aims to bring together researchers who are working on topics relevant to climate change and urban environmental deterioration to share their latest accomplishments and research findings. More specifically, this Special Issue will focus on (i) the identification of drivers of global climate change at the urban level; (ii) the assessment of climate-induced risk that threaten cities; (iii) the advancement of urban mitigation and adaptation strategies and techniques; (iv) the development of decision-making tools facilitating urban climate change mitigation and adaption; (v) the design of guidelines, policies, and regulations from the government and industries for the implementation of climate change mitigation and adaptation; and (vi) the analysis of pilot cases and exemplars in successfully addressing urban climate change issues. Nevertheless, this Special Issue will also welcome other themed papers which have explicitly indicated how their study is related to climate change and sustainable urban environmental planning.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
