Adapting to Climate Change: The Interplay between International and Domestic Institutions in the Context of Climate Finance

Message from the Guest Editor

Dear colleagues, Climate change is of crucial significance to all countries around the globe. The South is however particularly affected since they are highly vulnerable to climate impacts while not emitting many greenhouse gases (so far). Historically, they have not contributed to causing the problem but they are greatly affected by its consequences. Indeed, climate change creates multiple inequalities. Developed states are to a large degree responsible for climate change, but are forecast to confront only moderate adverse effects and are better equipped and able to adapt. Middle income or least developed states are not culpable and yet experience significant threats to livelihoods, assets and security. The UNFCCC Paris Agreement on climate change, signed in 2016, for the first time commits all nations to undertake ambitious efforts to combat climate change and adapt to its effects, with enhanced support to assist the South to do so...

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
