

Special Issue

Common-Pool Resources and Sustainability

Message from the Guest Editor

Interest in the environment and its subordinate elements of common-pool resources and sustainability appears to be as high as ever. This Special Issue of Sustainability aims to provide a collection of high-quality studies covering many of the varied topics traditionally investigated in the broad area of common-pool resources and sustainability. These include, but are not limited to, property rights formation, conservation, depletion, the tragedy of the commons, free riding, externalities, special interest groups, international agreements and treaties, government regulation, and international organizations. We welcome original papers relating to these and other aspects of common-pool resources and sustainability.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
