

Special Issue

The Role of Communication in Sustainable Development

Message from the Guest Editor

Our concerns as citizens nowadays are broadly and globally extended in many areas, such as social changes, health, economy, evolutions in technology, environment, education, etc. As a field of study, communication is applied in all of these areas as a bridge between the audience and the information, and it appears in many different contexts. Sustainability, on the other hand, is a medium to connect the present with the needs of tomorrow and is related to each and every form of human activity. This Special Issue examines the role of communication in providing sustainable development in areas of global societal progress and of individual interest in the current era. In this framework, original theoretical and research works are welcome. The topics of interest for this Special Issue include, but are not limited, to the following:

- Media sustainability;
- Public awareness;
- Audience engagement;
- Communicating sustainability in economic sectors (corporate, tourism, etc.);
- Environmental awareness;
- Education;
- ICT in sustainable development;
- Communicating social issues (i.e., reducing inequalities);
- Communicating health-related and well-being issues.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
