Community and Collaboration in Fashion and Textiles Practice and Education

Message from the Guest Editors

Dear colleagues,

The fashion industry as we know it today functions as a system within which people are encouraged to work in institutional and creative silos. The purpose of this Special Issue is to invite researchers and practitioners in the fashion and textiles disciplines to speculate and reflect on collaboration and community-based models for practice, which contribute toward promoting and achieving a greater understanding of what sustainable practice can be. We encourage researchers to consider the dynamics of place and time in relation to collaborative and community-based models for practice. We welcome both traditional paper submissions that contribute to theoretical and critical frameworks, as well as reports from practitioners who can evidence the potential of a critical praxis.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
