

## Special Issue

# What Psychology for a Sustainable Community?

### Message from the Guest Editors

Community psychology, together with clinical psychology, have been called to an imposing challenge, that is, to understand, in depth, the individualistic anomic culture, with anxious short-term visions, and to encourage development processes causing the sustainability of existence and the ability to invest in the long-term one of the first and most important key words. With this in mind, educational systems, support services and personal care, including health systems and formal and informal social networks, can be considered community pillars from which complex actions of cultural innovation can start. We are interested in contributions of different kinds: literature reviews, narrative or systematic; experimental research; evaluations of interventions; qualitative and quantitative studies. The goal is to collect studies addressing these issues, both from a general perspective and in relation to specific domains.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
