

## Special Issue

# Sustainable Construction and Architecture

### Message from the Guest Editor

The construction industry is widely regarded as destructive towards the natural environment and wasteful of finite resources. Many researchers and practitioners are seeking to improve industry performance and reduce its deleterious impacts. We value new research papers addressing potential solutions that will lead to a more sustainable construction industry. These may relate to operational energy usage, water efficiency, embodied energy, embodied carbon, waste minimisation, pollution reduction, indoor air quality, smart building monitors as well as reuse and recycling of building materials. Related topic areas will also be considered for this Special Issue. We are interested in the development of ideas and systems which will lift industry performance on a triple bottom line basis.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
