

Special Issue

Sustainable Optimization of Planning, Design, and Engineering in Construction Projects

Message from the Guest Editors

Building and urban areas are physical spaces in which we live and are social spaces which create human behaviors. Therefore, in an era of new paradigms and convergence, efforts to optimize various techniques can improve the quality of human life and bring urban sustainability to citizens. In this Special Issue, we are looking for high-quality research articles related to the following topics:

- Construction optimization in architecture and urban engineering;
- Optimization of construction project management;
- Construction project risk management;
- Sustainable building construction methods;
- Architectural or urban data analysis;
- Building information modeling;
- Smart construction technology;
- Solutions to optimize urban data analysis;
- Climate change in urban areas;
- Sustainable energy management and recycling;
- Sustainable building materials;
- Life cycle assessment analysis;
- Urban risk management;
- Urban resilience;
- Smart cities;
- Other topics related to socioeconomic and engineering issues of the topic of the Special Issue.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
