

Special Issue

Digital Consumption, Privacy Issues and Sustainability

Message from the Guest Editors

From a company point of view, digitization has lowered entry barriers to various markets, leading to increased competition and potential effects on prices. On the other hand, traditional companies have been forced to redirect their way of operating to adapt to the digital market. At the same time, the consumer is more integrated into the production process, since it is easier for the company to know their preferences, detect new market segments, and choose the right pricing strategy.

In this context, this Special Issue aims to identify digital consumption, privacy issues challenges, and related emergent questions from varied approaches.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
