Special Issue

Critical Infrastructure Safety, Resilience and Sustainability

Message from the Guest Editors

Critical infrastructure underpins the delivery of essential services such as power, water, transportation, and communications systems. It plays a critical role in boosting productivity, achieving the continued provision of essential services, and supporting national security and economic growth. The increasing complexity of infrastructure projects necessitates a focus on developing a safer, more resilient, and sustainable design strategies, standards, and regulatory framework. This Special Issue welcomes papers on:

- Approaches to, and theoretical and/or regulatory frameworks for, assessing the resilience of critical infrastructure elements;
- Promoting and reviewing the technologies necessary to support the development of sustainable critical infrastructure systems;
- Risk assessments and mitigation strategies for advancing our understanding of where risks exist in the critical infrastructure;
- Case studies that demonstrate examples of technologies and management strategies developed to enhance the safety, resilience, and sustainability of critical infrastructure:
- Future perspectives that bridge the topics of critical infrastructure safety, resilience and sustainability.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
