

## Special Issue

# The Narrative of Sustainability in Cross Cultural Dialogues amidst a Global COVID-19 Pandemic: An Interdisciplinary Approach

### Message from the Guest Editors

Contributing to a shared vision of a more sustainable world, the United Nations 2030 Agenda for Sustainable Development was established in 2015. Less than ten years away from 2030, our societies are far from being sustainable on a global scale. In addition, the COVID-19 pandemic that we are currently experiencing has halted the focus on the urgency of achieving sustainable communities by drastically shifting priorities and needs. New intercultural conversations are urgently needed. Thus, this Special Issue seeks to interrogate and reflect on the concept of sustainability in cross cultural dialogues (with a special focus on US–Europe –Asia conversations) from an interdisciplinary standpoint; promoting sustainable development and thinking sustainably in a world of vanishing resources and unprecedented global threats. Topics include: environmental sustainability; environmental justice; economic sustainability; resilience, ethics, and social sustainability; anthropological sustainability; social constructions of sustainability; environmental humanities.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
