

Special Issue

Current Issues in Sustainable Energy Production: Multidimensional Outlook for the Sustainable Economic Growth

Message from the Guest Editors

The purpose of this Special Issue is to undermine the current issues in sustainable energy production. For that, multidimensional factors of balanced scorecard entitled financial, customer, internal, and competitive perspectives are considered so as to discuss the effectiveness of energy production for sustainable economic growth. The novelties of this Issue are to provide a multidimensional outlook to the energy industry, and to give specific cases for developed and developing countries to illustrate the policy recommendations of sustainable energy economics.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
