# **Special Issue**

# Sustainability Challenges in Cyber Security for Smart Cities

### Message from the Guest Editors

Sustaining smart cities in the future would depend upon their capability to provide uninterrupted services to their citizens. The confluence of advancements in wireless technology, including the increasing deployment of 5G networks, artificial intelligence for extracting and classifying complex city data, and increasing affordability of commodity off-the-shelf IoT components, have enabled complex smart city ecosystems. On the other hand, adversarial strengths have also advanced manifold, owing to the ready availability of attacker tools, increasing digitisation leading to a substantial exposure of system and platform vulnerabilities, and the increasing involvement of nation-state actors in attempts to sabotage smart cities. In this Special Issue, cutting-edge research and topics may include:

- Cyber security strategy, policy, and planning
- Cyber resilience
- Evolving and emerging cyber threats
- IoT security
- Communication security
- Electric vehicle security
- Building area system security
- Privacy

## **About the Journal**

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
