

Special Issue

Sustainable Supply Chain and Operation Management

Message from the Guest Editors

Sustainability is becoming an increasingly important part of decision making for companies and governments. The United Nations adopted 17 Sustainable Development Goals and 169 targets seeking to achieve prosperity and peace for people and the planet. This Special Issue seeks research broadly focused on supply chain management and operations management from the perspectives of environmental, economic, and societal sustainability in developed or developing countries or in a global partnership. We welcome research using modeling, empirical, or both methodologies and primary, secondary, or both types of data to generate new insights that could be of value to company managers and/or governmental policymakers. Some topics of interest may include, but are not limited to, the following: climate change, water shortage, renewable energy, food and waste management, ethical sourcing and labor practices, sustainable transportation, and new product development.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
