

Special Issue

Sustainable Information Management and E-Commerce

Message from the Guest Editors

The convergence of sustainable information management and e-business in the digital transformation has become a key driver of the green economy. Its core strategy focuses on optimizing the information management process, strengthening the efficient use of resources, and realizing the sustainable development of e-business. With the increase in Environmental, Social, and Governance information disclosure requirements, information systems, as an important tool for enterprise management, are continuously integrating the concept of sustainable development and becoming a key tool for enterprises to assess their own sustainability and make strategic decisions. This Special Issue is dedicated to bringing together original, high-quality academic papers that have not yet been published or refereed in other journals, and bringing together the wisdom of experts at home and abroad to explore new paths, modes, and methods for the integration of sustainable information management and e-commerce. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
