

## Special Issue

# Sustainable Tourism and Hospitality: Destination Decision Making and Digitization

### Message from the Guest Editors

To embrace the changes in the travel environment after climate change and the COVID-19 pandemic, the tourism and hospitality industry must consider several issues. For example, the impact of digitalized travel information on destination choices, the relationship between the tourists' destination and hospitality choices and sustainability, tourist experience and creative tourism, digital transformation and education in tourism and hospitality, big data collection and data mining, and the theories and practices of post-COVID-19 tourism.

Therefore, this Special Issue aims to contribute to the sustainable development of tourism and hospitality post-climate change and the COVID-19 pandemic in the context of destination decision-making and digital transformation. This Special Issue welcomes original research articles. Articles on, but not limited to, the following topics: Sustainable Tourism;

Tourist Experience;

Creative Destinations;

Tourism and Hospitality Education;

Hospitality Experience;

Digital Transformation;

Post-COVID-19 tourism;

Climate Change;

Overtourism;

Smart Technologies;

Big Data and Data Mining;

Destination Choices.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
