Sustainability Accounting in the Global Context

Message from the Guest Editors

In the challenging context of the 21st century, understanding sustainability accounting has become increasingly important. Despite the steadily increasing volume of research in social accounting, there remain many topics to investigate, with a specific focus on the global context. We invite researchers to investigate the role of accounting in advancing social and environmental practices in the global context amidst the recent health and financial crises. Future research could examine challenges facing sustainability accounting, including, but not limited to, climate change, human rights, and food security issues. Future research could also investigate the consequences and determinants of corporate social irresponsibility in the global context. Moreover, examining the role of corporate governance, especially when considering the significant changing environment for corporate governance in the information age and technological advances of the global world, is an interesting topic that requires further investigation. Finally, an appreciation of cultural differences that impact the implementation of sustainability accounting in the global context is a fruitful research area.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
