# Urban Heat Island Mitigation and Adaptation for Sustainability in Developing Countries

# Message from the Guest Editors

The number of inhabitants in urban areas has been increasing dramatically in recent decades due to the socioeconomic prosperity footprint of urban agglomeration when compared to rural areas. Urban agglomeration in this context refers to the spatial concentration of socioeconomic activities in urban areas that has led to an increase in impervious surface density at the expense of green spaces. One of the resulting significant adverse impacts from this development has been the urban heat island (UHI). The highlighted point is that the effects of the UHI have been accelerating at an alarming rate and approaching levels of irreversibility. Thus, in the past few decades, research on the UHI has become prominent in various fields... Dr. Dissanavake Dmslb

# **About the Journal**

# Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief
