

## Special Issue

# Digital Transformation of Energy: Advanced Monitoring and Assessment of Industrial Ecosystems

### Message from the Guest Editors

This Special Issue aims to explore innovative perspectives and interdisciplinary approaches to advance sustainability in complex socio-ecological systems. The focus is on identifying practical, scalable strategies that address environmental, economic, and social challenges in the context of the UN Sustainable Development Goals (SDGs). The purpose of this Special Issue is to provide a platform for researchers, practitioners, and policymakers to engage in a cross-sectoral dialogue, highlighting best practices and emerging trends in sustainability science. Contributions are expected to address issues such as climate adaptation, circular economy, sustainable governance, education for sustainability, and stakeholder engagement. This Special Issue will complement the existing literature by integrating diverse disciplinary perspectives and offering a synthesis of novel approaches to sustainability. By building on and extending current research published in *Sustainability* and related journals, this Issue will contribute to a more holistic understanding of sustainability transitions and foster actionable knowledge for long-term resilience and development.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
