

## Special Issue

# Smart Cities and Smart Villages and the Global Digital Transformation: Strategy and Community Engagement—2nd Edition

### Message from the Guest Editor

This Special Issue (SI) will focus on the most recent advances in smart cities and smart villages research to encourage, nourish, and promote the development of strategies conducive to smart cities/villages sustainable growth and development in times of the global digital transformation. The key objectives of this SI are: (i) to examine how advances in sophisticated information and communication technology (ICT) broaden the range of opportunities to develop sustainable development strategies for smart cities and smart villages at local, regional and global levels and across issue-areas; (ii) to identify the ways, methods and strategies by means of which the variety of stakeholders (can) engage in the processes of co-creating and making smart cities and smart villages thrive, and how ICT weighs in these processes; (iii) to reflect on the interpretive lens and explanatory potential that are offered by the existing literature on the subject, (iv) to query whether best practice-sharing and specific business and policy strategies might be helpful boosting smart cities' and smart villages' sustainable and development.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
