# Design of Injection Molding in Sustainable Materials

### Message from the Guest Editor

The injection molding of plastics is currently presented as the most widespread manufacturing process with plastic materials at an industrial level. This highlights the great impact that adequate design and optimization of the molding process can have in the environment. positioning it today as one of the areas of greatest interest in the industrial and research field. The environmental impact of the molding process depends on multiple factors, many of which are directly related to the design of the mold and the use of sustainable materials. The design of green molds has the great advantage of improving the efficiency of the mold in terms of productivity, environmental impact, and the use of new sustainable materials in its manufacture. For all these reasons, the molding process presents multiple opportunities and challenges for researchers in line with current and future sustainability strategies.

## **About the Journal**

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
