

## Special Issue

# Digital Innovations and Smart Technologies for Occupational Health and Safety in Construction

### Message from the Guest Editors

Occupational health and safety (OHS) is one of the major concerns in the construction industry because of the increased number of fatal and non-fatal injuries among construction workers. It is widely known that these occupational injuries can lead to substantial disorders, project delays, increased project costs, workers' absenteeism, medical burden, and permanent disabilities. Given these adverse effects, there is a need to mitigate occupational injuries in construction by monitoring construction hazards and suggesting proactive injury-preventive measures. With the advancement of digital innovations and smart technologies, there is great potential for researchers and industry practitioners to improve occupational health and safety among construction workers. The goal of this Special Issue is to publish technical, empirical, and review papers that make practical and theoretical contributions to the cutting-edge digital innovations and smart technologies with the latest research findings and practical interventions to enhance OHS in the construction industry.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
