Special Issue

The Influence of Transport on Global Warming and Environmental Sustainability

Message from the Guest Editors

As the transportation sector is a major source of greenhouse gas emissions, primarily carbon dioxide, due to the burning of fossil fuels in vehicles, such as cars, trucks, ships, and airplanes, scientific research on this topic plays a great part in sustainable development in the future. The Influence of Transport on Global Warming and Environmental Sustainability delves into the consequences of these emissions, including rising sea levels, extreme weather events, and disruptions to ecosystems. It also underscores the urgent need for sustainable transportation solutions, such as electric vehicles, public transportation systems, and alternative fuels, to mitigate the adverse effects of transportation on the environment. Policymakers, industries, and individuals all play crucial roles in addressing this issue through the adoption of eco-friendly transportation practices and the development of efficient, lowemission transportation technologies. Ultimately, understanding the influence of transport on global warming and environmental sustainability is vital for creating a more sustainable future for our planet.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
