

Special Issue

Integrating Sustainability in Engineering: Towards a Sustainable Future

Message from the Guest Editors

This Special Issue examines how human activities impact the environment, and it emphasizes the need to rethink engineering to address biodiversity loss and social inequality. On the one hand, this Special Issue aims to highlight the critical role of training engineering teachers and professionals to fully integrate sustainability principles and align them with the Sustainable Development Goals (SDGs). On the other hand, it addresses topics such as energy efficiency in engineering systems, renewable energy technologies, sustainable materials and processes, Circular Economy approaches, and smart systems and sustainable design. The aim of this Special Issue is to explore and promote sustainable practices in engineering by showcasing cutting-edge research and practical applications. This Special Issue addresses energy efficiency, renewable energy technologies, sustainable materials, circular economy approaches, smart systems, and ways to integrate sustainability into university engineering curricula. Our goal is to integrate sustainability with current challenges for a sustainable, energy-conscious future.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
