Special Issue

Advances in Photovoltaic Technologies and Sustainable Energy Solutions

Message from the Guest Editor

With the continued global effort in mitigating the dependence on a singular energy source, solar photovoltaic devices have been presenting a dependable alternative for decades. From conventional first-generation silicon cells to perovskites and tandem cells, research and development in this area confirm the central position of solar photovoltaic devices in the global energy mix. This Special Issue focuses on the latest advances and trends in solar photovoltaic technologies, material synthesis deposition and characterization and new device design and modeling. Improvements in device efficiency as well as price/kW are occurring at an ever-increasing pace, and research and development efforts offer significant insights on these important trends. The scope of this Special Issue includes, but is not limited to, photovoltaic materials, device design, electrode selection, the replacement of hazardous materials, manufacturing technologies, additive manufacturing roles, device simulation, device testing, circular economy, novel materials, etc.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
