Special Issue

Damage Detection of Steel Structures with Advanced Computational Techniques

Message from the Guest Editors

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Experimental, numerical, and analytical studies on damage detection in steel structures
- Novel sensors, instrumentations, and robotic systems for damage detection in steel structures
- Advanced parameter/dynamical load identification and signal processing techniques for damage detection
- Long-term behavior under severe environmental exposures and sustained loading (e.g., corrosion fatigue)
- Retrofitting solutions using novel approaches to damage structures, for example, FRP/SMA (e.g., bond behavior, pre-stressing methods)
- Multi-axis damage and fatigue studies of structural ioints
- Ultimate load capacity and reliability of mechanical structures
- Multi-scale/multi-resolution studies of failure criteria and damage evolution
- Simulation and prediction methodology for damageinduced steel structural performance deterioration

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
