

Special Issue

Damage Diagnosis and Safety Assessment of Bridge Structures under Multiple Hazards

Message from the Guest Editors

This Special Issue aims to gather manuscripts on the recent scientific developments in probabilistic hazard analysis, structural exposure models, damage diagnosis methods, testing and measurement techniques, dynamic behavior and protection technology, damage mechanism, risk assessment framework, and resilience-based approaches. It will provide important theoretical and technical support for bridge damage diagnosis and safety assessment, and promote communication and cooperation between design, construction, research, teaching, and production. This Special Issue welcomes original contributions and recent progress on the fundamental theory, research papers, and case studies on, but not limited to, the following topics:

- Dynamic behavior and mechanism of bridges under multiple hazards;
- New technology and methods of damage diagnosis for bridge structures;
- Intelligent sensing technology for bridge health monitoring;
- Risk- and resilience-based evaluation and design for bridges;
- Life cycle analysis, retrofit, and rehabilitation;
- Multi-disaster effect and vulnerability models;

Guest Editors

Prof. Dr. Kai Wei

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
