

Special Issue

Data Analytics and Predictive Analytics for Sustainable Development

Message from the Guest Editors

This Special Issue will entail studies that investigate the data analytics and predictive analytic methods related to the multidimensional aspects of sustainability. Through a set of studies, it investigates beneficial methods for big data analysis, predictive analysis, decision making, and research directions towards addressing the current problems related to sustainability. Policy designing should incorporate advanced predictive analytics techniques towards the acceleration of the basic amendments for a sustainable way of living. The Special Issue “*Data Analytics and Predictive Analytics for Sustainable Development*” aims to present practical solutions answering to current issues related to sustainability such as climate change, green technology, smart cities, and environmental problems by focusing on the promising methods of data analytics and predictive analytics. Specifically, the Special Issue aims to present the most novel accomplishments and advancements in big data discovery and investigation in the context of sustainability. Both theoretical types of research and practical applications are encouraged for submission.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
