

Special Issue

Sustainable Data Governance of Government

Message from the Guest Editors

Data are recognized as a key element for the realization of scientific administration and effective decision-making in government. Governments around the world are pushing data policies to enhance the country. This Special Issue discusses various theoretical and practical topics for the establishment and realization of sustainable data policies in the public sectors. It covers major issues related to data governance, such as technological elements and application plans necessary to realize a data-driven government such as artificial intelligence, big data, and data science, laws and systems, open data and their disclosure, data-driven public services, and privacy issues.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
