

Special Issue

Big Data, Knowledge Management and IoT: New Perspectives for New Challenges in Disruptive Times

Message from the Guest Editors

The Special Issue aims to explore how big data, knowledge management, and IoT policy actions, strategies, and tools can provide efficient solutions for new challenges in disruptive times, such as covid-19 and post-covid-19 scenarios.

Data have become a strategic asset for companies, economies, and societies, both now and in the future knowledge economy. The value extracted from data (agriculture data, geographical data, energy consumption data, health data, transport data, etc.) is leading to innovation. Thus, the generation of value in the different parts of the data value chain will become a key issue in the near future for transforming industries and services, increasing productivity and efficiency.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
