

## Special Issue

# Big Data, Knowledge Management and IoT: New Perspectives for New Challenges in Disruptive Times

### Message from the Guest Editors

The Special Issue aims to explore how big data, knowledge management, and IoT policy actions, strategies, and tools can provide efficient solutions for new challenges in disruptive times, such as covid-19 and post-covid-19 scenarios.

Data have become a strategic asset for companies, economies, and societies, both now and in the future knowledge economy. The value extracted from data (agriculture data, geographical data, energy consumption data, health data, transport data, etc.) is leading to innovation. Thus, the generation of value in the different parts of the data value chain will become a key issue in the near future for transforming industries and services, increasing productivity and efficiency.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
