

Special Issue

Participatory OR Approaches for Sustainable Decision Making and Systems Development

Message from the Guest Editors

This Special Issue focuses on participatory OR approaches that are used to support decision making in the area of sustainable development at any level, community, organisational, economical, or societal. It aims to present original research articles showcasing innovative collaborative modelling techniques and approaches leading to new sustainable system improvements and management policies that ultimately lead to improved system performance. Improved performance can take many forms and may focus on more than one objective, including—though not exclusively—improved efficiency, productivity, competitiveness, social good, and profitability.

Guest Editors

Dr. Antuela Anthi Tako

School of Business and Economics, Loughborough University, Epinal Way, Leicestershire LE11 3TU, UK

Dr. Sondoss Elsayah

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
