

Special Issue

Sustainable Desalination and Wastewater Treatment: A Way Forward for Water, Energy, and Environment Security Nexus

Message from the Guest Editors

This Special Issue of *Sustainability* aims to allow researchers to exchange their novel ideas, technical innovations, and research outcomes related to the design, analysis, and development of novel desalination and wastewater treatment technologies and present the impacts on sustainable development. Keywords

- advanced desalination systems
- wastewater treatment and reclamation
- environmental impacts
- zero-liquid discharge
- brine management
- socioeconomic issues
- renewable energy-powered membrane systems
- valuable resource recovery
- nutrient and energy recovery
- hybrid configurations
- emerging contaminants
- membrane fouling
- water-energy-environment nexus
- membrane fabrication

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
