

Special Issue

The Future of Design for Sustainability

Message from the Guest Editors

Today, the health of both our environment and our societies is at a critical state, at a breaking point, with piecemeal solutions offered as social-media-friendly rallying points. It can be argued that the awareness of the concept of sustainability and the need to reduce our negative impact upon the environment and society has grown significantly and, consequently, has moved up the global agenda. This Special Issue of *Sustainability* is seeking papers that push the frontier of what design for sustainability could be—and possibly *should* be—across the broad spectrum of design disciplines, including product design, user experience design, service design, etc. In particular, we invite manuscripts that question and offer alternatives to the current thinking, strategies, and directions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
