

## Special Issue

# Digital Technologies and Sustainability Management in Organisational and Developmental Environments

### Message from the Guest Editors

The relationship between digital technologies and sustainability management has attracted increasing attention in the corporate environment, policy making and pressure groups, and academic communities. It is becoming increasingly evident that digital technology deployment and sustainability management are closely connected, warranting further research in a number of contexts. This Special Issue will supplement the existing literature on digital transformation and sustainability and advance our understanding of the relationship between these concepts and how they may be productively pursued in practice in enterprises, the public sector, and in the management of our urban and rural environments.

We welcome the submission of empirical work, including case studies and surveys (in both developed and developing world environments) adopting either qualitative or quantitative approaches. We also invite conceptual papers that investigate the mutual benefits of, and possible tensions between, digital transformation and sustainability management.

We look forward to receiving your contributions.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
