

## Special Issue

# System-wide Disruption of Organisations for Sustainability

### Message from the Guest Editors

The time for incremental change is over. Covid-19 has underscored not only the need for a radical rethinking of how our societies are organised, but the fact that this is possible. In many countries around the world, governments are enacting rapid and radical changes to support those who are, and who are becoming, vulnerable as a result of the spread of the corona virus - forms of help, that until now, they indicated was impossible (Baker, 2020). If we want to have any hope of staying within the safe operating space for humanity (Rockström et al., 2009), let alone for other species (Barnosky et al., 2011), rapid, radical and disruptive changes will be needed (Anderson & Bows, 2012; Steffen et al., 2018) across all areas of human endeavour. ## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
