

Special Issue

Dynamics of Heat Spots and Sustainable Agriculture

Message from the Guest Editors

Due to the commitment made by several nations to reduce global warming through the Paris Agreement in 2015, there is a need to produce more food sustainably. This Special Issue will highlight new research on sustainable agriculture models and hotspot reduction. We accept submissions on remote sensing applications for environmental monitoring; quantification of heat stations in agricultural areas and biomes, among others; sustainable food systems; and dynamics of carbon emission in agricultural areas. Submissions focused on sustainable agriculture and climate change are also encouraged.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon
School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
