

Special Issue

Digital and Sustainable Transformation of Education: Technology Enhanced-Teaching, Learning and Social Inclusion

Message from the Guest Editor

In early 2020, emerging ICTs set the stage for digital transformation. With so much room for organizations to harness the full potential of digitization, the COVID-19 pandemic has significantly boosted the adoption of these technologies worldwide. Education was one of the main areas in which these accelerated processes took place. The pandemic has prompted all university structures to refresh their knowledge management and governments to invest in e-learning. While the COVID-19 pandemic has accelerated the trend toward the adoption of ICTs in education areas, embracing these technologies can be hindered by external interests and adverse effects on well-being. In this scenario, the social inclusion generated by the digital transformation emerges as an essential research focus. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: E-inclusion in education, ICTs acceptance in education, ICTs success in education, and new techniques and tools to improve teaching, learning, or social inclusion based on digital tools.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon
