

Special Issue

Biotechnology and Biochemistry of Crop Plants

Message from the Guest Editor

Crop plant biotechnology and biochemistry are important disciplines in agricultural science. Whereas in biotechnological studies, techniques for achieving specific requirements are explored using plant systems, biochemical investigations examine crop plants from the cellular to whole-plant level under both normal and adverse conditions. This Special Issue will provide a platform for researchers to share their experiences and facilitate further discussion to promote research and applications based on biotechnological and biochemical knowledge for crop improvement. This Special Issue invites original research papers, reviews, and short communications on the following areas, as well as related topics:

- Biochemical process;
- Photosynthesis;
- Growth hormones;
- Enzymes;
- Biotechnological studies;
- Genetic engineering;
- Transgenic crop plants;
- Micropropagation;
- Stress, signaling and defense responses;
- Biosynthesis and regulation of specialized metabolites.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
