Editorial Board Members' Collection Series: Climate Change and SDGs

Message from the Guest Editors

Among all SDG goals, SDG13 calls for urgent action to combat climate change and its impacts. However, as climate change presents the single biggest threat to humans, its widespread and unprecedented impacts make it extend far beyond SDG 13, and be closely connected to all other SDGs. More precisely, according to WMO, seven climate indicators (CO₂ concentration, ocean acidification, GMST, OHC, sea-ice extent, glacier mass balance, and sea-level rise) pose direct risks to sustainable development (WMO-No. 1271). To hold warming below 1.5 °C and avoid the worst impacts of climate change, science demands that greenhouse gas emissions must urgently peak and achieve carbon neutral by 2050. At the same time, scientists are intensely working on various climate-related projects to combat climate risks. To collect work on this topic, we are establishing this series that aims to further raise the awareness of climate scientists and promote academic communication in this field.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
