

Special Issue

Emerging Sustainable Nanomaterials: Exploration and Advanced Applications

Message from the Guest Editors

Nanotechnology is an incredibly important technology with applications in a wide range of areas; however, many methods for the generation of nanomaterials require unsustainable materials or can have an unsustainable impact on the environment. In order to address these issues, new methods for the synthesis of nanomaterials which would involve more sustainable methods and less impactful products have been favored in recent years. Hence, this Special Issue focuses on new methods being developed to produce less environmentally damaging nanomaterials.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
