

## Special Issue

# Virtual Reality/Metaverse Applications in STEAM Education and Creativity: Towards Student Learning Sustainability

### Message from the Guest Editors

The Metaverse emphasizes immersive technologies such as Virtual Reality (VR), Augmented Reality (AR), Mixed Reality (MR) and 3D virtual worlds (e.g., 360 images or videos from point cloud data). The question of how to effectively design and apply the Metaverse in teaching and learning remains crucial for the development of effective instructions and learning experiences. The main scopes for this Special Issue are investigations into areas that explore the impact of immersive technologies in response to facilitating and enabling synchronous, asynchronous online or hybrid learning environments, such as, but not restricted to, the application of the Metaverse to education, cooperate training and human resources and talent development. We look forward to receiving your contributions.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
