

## Special Issue

# Emerging Digital Technologies for Sustainable Construction

### Message from the Guest Editors

Previous studies have showed the utilization of digital technologies to achieve sustainability at some or all of the design, construction, and operation stages of construction projects, indicating meaningful connections between constructional sustainability and digital technologies. The theoretical basis underlying these connections is lacking conspicuously, and the potential for and empirical evidence regarding the use of digital technologies to achieve sustainable construction have yet to be fully explored. It hence is imperative to carry out in-depth investigations on both the theoretical and empirical aspects relating to assimilating emerging digital technologies in sustainable construction.

The aim of this Special Issue is to contribute to the literature by presenting theoretical, conceptual, methodological, and empirical studies about how advanced digital technologies facilitate or realize sustainability at different stages of construction projects. Review papers that systematically analyze the most up-to-date and future developments of this domain are also welcome.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
