

Special Issue

Ecosystem Services in Environmental Impact Assessment: Repercussions on Eco-Design

Message from the Guest Editor

Through this Special Issue, we aim to collect criteria/methods/approaches/tools to quantitatively/quantitatively assess the impacts on the ecosystem services of a (eco)design solution. In particular, the following aspects may be investigated:

- Assessing the environmental impacts of design solutions in a hypothetical scenario, where they are far from being realized into products with a defined life cycle, differently to standard life cycle assessment (LCA);
- Assessing the repercussions on social sustainability of a design solutions: what social aspects and what measurement criteria?
- Defining the reliable valuation perimeter of ecosystem services for different design solutions, in order to reduce the efforts during evaluation;
- Comparing the environmental impacts of ecosystem services with social and economic impacts for a design solution.

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
