

Special Issue

Renewable Energy, CO₂ Emission and Regional Economic Development

Message from the Guest Editor

The pressing global challenges of climate change and economic development require innovative solutions. Renewable energy plays a pivotal role in addressing both issues. This proposed Special Issue will explore complex interplay between renewable energy adoption, CO₂ emissions reduction, and regional economic development. It will shed light on how the transition to renewable energy sources can not only mitigate environmental impacts but also stimulate sustainable economic growth in different regions of the world. This Special Issue will provide a comprehensive understanding of the intricate relationships between renewable energy, CO₂ emissions, and regional economic development. It will offer valuable insights for policymakers, practitioners, and researchers to design and implement strategies that promote sustainable growth while mitigating climate change. By delving into the crucial nexus of renewable energy, CO₂ emissions, and regional economic development, this Special Issue will contribute to global efforts to mitigate climate change and foster sustainable prosperity. We invite scholars and experts to help us to create a more sustainable and economically vibrant future.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
