The Complicated Relationship between Innovation and Sustainability: Opportunities, Threats, Challenges, and Trends

Message from the Guest Editors

Firstly, evidence suggests that outcomes of innovation do not necessarily determine a progress towards sustainability. On the contrary, innovation often contributes to exacerbate many of the problems, or even the creation of new ones.

In addition, it is not just innovation fostering sustainability, the reverse is also true. Many companies are experiencing a path to sustainability-driven innovation, where sustainability criteria are integrated into the creation of new products, processes, and services. This different vision of sustainability that leverages innovation has the power to change the traditional image of sustainability as a cost of doing business into a business driver that can simultaneously improve performance and offer a source of competitive advantage.

Furthermore, just like the concept of sustainability is a multidimensional phenomenon involving economic, social, institutional, and environmental problems, similarly there are different types of innovations towards sustainable development. All this complexity needs governance in order to effectively serve for the ultimate goal of preserving the future of our planet.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
